

# Story Board 1 - Adding Loans

Sarah is just created an account and currently has no loans entered. She wants to begin adding her Student Loans so she can see when everything will be paid off. She hits the "Add Loan" Button and a new pane comes up. She then has to switch back and forth between the student loan website and the Student Loan Calculator to fill fields out. Once her first loan is added, the dashboards data beings to populate graphs and data

# Story Board 2 - Adding Payment

Sarah has just added her student loans to the dashboard. She now has a basic overview of when her loans will be paid off if she only paid the minimum payment amount each month. However, her current plan involves making payments higher than the minimums so, she needs to create a "Current" plan to supersede the minimum plan.
